

Bay Ship & Yacht Co. is a full service shipyard with all of the skills, services and resources necessary to build, dry-dock, maintain and retrofit any vessel from 30' to 400'. Major in-house skills include:

- New fabrication and structural repair
- Re-powering
- Equipment overhaul and laser alignment
- Exhaust pipe lagging
- Electrical power and control system troubleshooting, installation and repair
- Hydraulic equipment and piping system repair and installation
- Fine cabinetry and joiner work
- Complete surface preparation and painting systems

The dry-docking, modification and refurbishment of a marine vessel is a demanding and complex undertaking. It requires a shipyard with the experience, skilled personnel, facilities and management systems necessary to ensure a smooth production process and successful outcome. The many unique advantages offered by Bay Ship & Yacht Co. position it as the best choice for a marine refit.

Bay Area's 21<sup>st</sup> Century Shipyard

# BAY SHIP & YACHT CO.

*Servicing vessels  
 from Kodiak to  
 San Diego for over  
 34 years.*

# We invite you to visit our yard...

Close to two international airports, Bay Ship & Yacht is located in Alameda, California, the center of the San Francisco Bay, adjacent to the Alameda ferry terminal which provides regular service to Oakland and San Francisco.

Facilities include:

- 3,000-ton floating dry-dock with deep draft capabilities
- 1,200-ton Syncrolift® with a land based transfer system and 1,000-tracked feet for dry-berthing
- Deep water pierside berths with full services
- In-house shops located on-site with equipment to accomplish all major ship repair, conversion and new construction work
- Modern customer offices with phone, fax, internet, Satellite TV and other amenities

Bay Marine Boatworks in Richmond, Ca, services vessels up to 100' with its 100-ton Travel Lift™. Overflow berthing and pierside work is available at our 1,000' Treasure Island pier centrally located between SFO and OAK airports with easy access to downtown SF and the East Bay.

## KEY ADVANTAGES

### Structural Aluminum and Steel Fabrication, Modification and Repair

With years of experience with large structural aluminum and steel renewals, modifications and vessel enlargements, we can repair, convert or build new, based on your particular needs.

### Systems and Equipment Installations and Repair

Our complete machine and hydraulic shop provides new equipment installation and repair. Vessel refits include re-powering, new and modified mechanical and electrical systems and interior joinery. Our shop machinists are experts in repair and custom parts fabrication including ABS shaft repairs and machining in our 42' lathe.

### Bay Propeller Service and Repair

Our on-site prop shop has the expertise to repair small pleasure craft props up to highly skewed 26' diameter props. Our tech experts have years of experience using state-of-the-art equipment to measure, braze, weld, balance, straighten, pitch, polish, cut keyways and bore tapers.

### In-House Naval Architecture and Engineering Department

Bay Design & Engineering's on-site team of naval architects, mechanical and systems engineers, offer expert advice, design and analyses for all types of vessels including preliminary to completely detailed drawings.

### Comprehensive, Fully Integrated Project Management System

A dedicated Project Manager will oversee your project and ensure the allocation of significant resources for planning and performance on your work. Our processes are designed to ensure a timely redelivery while identifying and mitigating risks early in the project cycle.

### Personnel

We provide an in-house program for the training and development of our workers. This allows us to field a large, highly skilled workforce to support major projects on a 24-hour-a-day schedule if necessary.

### Company-Wide Dedication to Customer Satisfaction

Bay Ship & Yacht's primary objective is to ensure that we achieve **Absolute Customer Satisfaction**. All employees understand that it is only by ensuring that every customer returns that we remain the industry leader.

## RECENT PROJECTS

### Aliotti Bros.

- Emergency shaft repair
- Underwater body paint and zincs

### Sound Reliance (Crowley)

- Deep draft ATB
- Docked for routine regulatory inspection and repairs
- Performed hull and superstructure paint
- Cooling water pipe cleaning

### Oscar Dyson (NOAA)

- Complete paint and machinery package
- Complete overhaul of cranes and a-frames

### Pacific Sun

- Complete underwater body and top side preservation from keel to top of the mast
- Steel renewals
- Tank Painting
- Basic machinery inspections and maintenance

### Kellie Choest (Edison Choest)

- Propeller and thruster seal maintenance
- Hull preservation
